

UNIQUEPLUS - PB

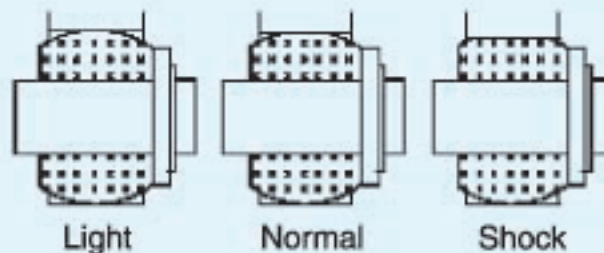

Pin Bush Couplings

- UNIQUEPLUS Pin Bush Couplings are used in General Engineering applications for reliable power transmission under normal shaft misalignments.
- Progressively increasing stiffness characteristics of special shaped buffers ensure control of vibration amplitude for protection of equipment.
- Also available couplings with Brake Drum & Couplings with spacer.

We also manufacture tyre couplings in various series i. e. PH, PX, TC, DG & U Series. PH Series has largest range upto 2000 HP at 100 rpm.

Deformation of bared buffer with increasing loads.
